Marcelo Tavora

Full-Stack Engineer · React · Node.js · AI Tooling
Fortaleza, Ceará, Brazil

Summary

Full-Stack Engineer with 5+ years building web products across fast-paced startups and scale-ups. Strong frontend depth in React.js/TypeScript, solid backend experience in Node.js/NestJS, and hands-on AI tooling with agents, MCP, and streaming integrations. Founded and shipped AM Finance — a SaaS product I took from zero to production, owning the full lifecycle: ideation, architecture, marketing strategy, and deployment. Comfortable working independently, taking full ownership of features end-to-end, and collaborating async with remote international teams.

Experience

Hubs.is

Software Engineer

July 2025 - Present (11 months)

Califórnia, Estados Unidos

- Work autonomously in a remote-first, async environment with an international team, taking full ownership of tasks from scoping to delivery.
- Proactively identify and fix bugs across frontend, backend, and database layers — going beyond assigned scope to improve overall system quality.
- Develop features end-to-end with minimal handholding: given only a high-level brief, I research, architect, and ship independently.
- Built AI-powered solutions including LLM agents, MCP (Model Context Protocol) integrations, and real-time AI streaming tools.
- Suggest architectural improvements and contribute to code reviews, helping raise the team's technical bar.

AM Finance

Founder & Full-Stack Engineer

October 2024 - Present (1 year 8 months)

Fortaleza, CE

- Founded and independently shipped AM Finance, a personal finance SaaS — owning the full product lifecycle from ideation and UX to engineering, cloud deployment, and go-to-market strategy.

- Built the full stack: React.js frontend, Node.js backend, database architecture, and AWS infrastructure.
- Defined and executed the marketing and user acquisition strategy, going beyond a typical engineering role to think and act as a product owner.

Febracis Coaching

Mid level Front-End Developer

August 2024 - August 2025 (1 year 1 month)

Fortaleza, Ceará, Brasil

- Actively participate in the project's development, mainly on the Front-end, using React.js with Material UI, Formik, Context, and TypeScript.
- Work with the team using agile methodologies such as Scrum and Kanban.
- Responsible for developing full-stack tasks with React and Node.
- Review pull requests.
- Develop screens based on Figma prototypes.

Canix Soluções em TI

Mid level Full-Stacks developer

January 2023 - November 2024 (1 year 11 months)

Fortaleza - CE

- Actively participate in project development on the Front-end, primarily using React.js with PrimeReact, React Query, and Redux
- Use agile methodologies such as Scrum together with the team
- Perform integration tests with JUnit in the Back-end and Jest in the Front-end
- Responsible for the architecture and organization of Front-end projects
- Organize and distribute activities among Front-end developers
- Develop screens based on Figma prototypes
- Organize the GitHub repositories for Front-end projects
- Develop Full-Stack tasks using Spring and React.js
- Develop Back-end and Front-end integration tests using Jest and JUnit

neWave Telecom

Full-stack Developer

May 2022 - November 2022 (7 months)

Fortaleza, Ceará, Brasil

Responsible for developing the company's omnichannel solution in the Front-end using React.js with Material UI, and also in the Back-end using Express, PostgreSQL and Redis.

Unifor

Front-end developer

February 2022 - September 2022 (8 months)

Fortaleza, Ceará, Brazil

- Responsible for developing the project's Front-end using Angular.js and PrimeNG
- Resolved responsiveness issues present in the application
- Managed the project architecture and internationalization with i18n

Edubrahub

Front-end developer

November 2021 - January 2022 (3 months)

Participated in the development and refactoring of an ERP frontend using React.js with Styled Components, Redux and React Query.

Five Digital Solutions

Co-founder & Front-end Developer

August 2021 - November 2021 (4 months)

- Managed and developed landing pages for various companies using HTML, CSS and JavaScript
- Sourced clients and participated in negotiations
- Developed websites based on Figma prototypes
- Responsible for application SEO

S4E

Intern Front-end Developer

March 2021 - August 2021 (6 months)

Fortaleza, Ceará, Brasil

Responsible for developing the frontend of an ERP for dental clinics using Angular.js and React.js, and built a solid foundation in Agile Methodologies and Git.
